Questions

1. Data-driven Tests

Introduction

Creating a DataTable parameter

How to do it...

How it works...

See also

Retrieving data from a DataTable

Getting ready

How to do it...

How it works...

Storing data in a DataTable

How to do it...

How it works...

There's more...

See also

Importing an Excel file to a test

Getting ready

How to do it...

How it works...

There's more...

See also

Exporting a DataTable

How to do it...

How it works...

There's more...

Parameterizing Test Object properties

How to do it...

There's more...

See also

Defining test cases using a DataTable

Getting ready

How to do it...

How it works...

Storing data in the Environment object

How to do it...

How it works...	
There's more...	
See also	
Retrieving data from the Environment object	
Getting ready	
How to do it...	
How it works...	
See also	
Reading values from an INI file	
Getting ready	
How to do it...	
Using a configuration file to manage test environments	
Getting ready	
How to do it...	
How it works...	
Using a global dictionary for fast shared data access	
Getting ready	
How to do it...	
How it works...	
See also	
Using a global dictionary for fast shared code access	
Getting ready	
How to do it...	
How it works...	
There's more...	
See also	
2. Testing Web Pages	
Introduction	
Checking whether page links are broken	
Getting ready	
How to do it...	
How it works...	
There's more...	
See also	
Deleting cookies	
Getting ready	
How to do it...	
How it works...	
Managing multiple browser windows	
Getting ready	
How to do it...	
How it works...	
Handling pop-up dialogs	
Getting ready	
How to do it...	
How it works...	
Downloading a file using XMLHttpRequest	
Getting ready	
How to do it...	
How it works...	
Checking whether a website is up	
Getting ready	
How to do it...	
How it works...	
See also	
Uploading a file using FTP	
Getting ready	
How to do it...	
How it works...	
Identifying elements based on anchors	
How to do it...	
How it works...	
Synchronizing a test with a web page loading	
How to do it...	
How it works...	
Accessing web elements through DOM	
How to do it...	
How it works...	
See also	
3. Testing XML and Database	
Introduction	
Establishing and closing a database connection	
Getting ready	
How to do it...	
How it works...	
Using SQL queries programmatically	
Getting ready	
How to do it...	
How it works...	
Using a database checkpoint	
Getting ready	
How to do it...	
How it works...	
Using an XML checkpoint	
How to do it...	
How it works...	

4. Method Overriding	
Introduction	
Overriding a Test Object method	
Getting ready	
How to do it...	
How it works...	
There's more...	
Number of function arguments	
Interoperability of registered functions	
See also	
Registering a method to all classes	
Getting ready	
How to do it...	
How it works...	
Using method overriding to support object subtypes	
Getting ready	
How to do it...	
How it works...	
There's more...	
Adding a new method to a class	
How to do it...	
How it works...	
See also	
5. Object Identification	
Introduction	
Setting mandatory and assistive properties for a class	
Getting ready	
How to do it...	
How it works...	
Using Descriptive Programming inline	
Getting ready	
How to do it...	
How it works...	
Using the Description object	
Getting ready	
How to do it...	
How it works...	
Using child objects	
How to do it...	
How it works...	
Using native properties for object identification	
Getting ready	
How to do it...	
How it works...	
There's more...	
See also	
Identifying an object based on its parent	
How to do it...	
How it works...	
6. Event and Exception Handling	
Introduction	
Catching errors inside a function or subroutine	
Getting ready	
How to do it...	
How it works...	
See also	
Creating and using a recovery scenario	
How to do it...	
How it works...	
Using a global dictionary for recovery	
Getting ready	
How to do it...	
How it works...	
7. Using Classes	
Introduction	
Implementing a class	
Getting ready	
How to do it...	
How it works...	
See also	
Implementing a simple search class	
Getting ready	
How to do it...	
How it works...	
Implementing a generic Login class	
Getting ready	
How to do it...	
How it works...	
Implementing function pointers	
Getting ready	
How to do it...	
How it works...	
See also	
Implementing a generic Iterator	
Getting ready	
How to do it...	

How it works...
8. Utility and Reserved Objects
Introduction
Using global variables (Environment)
Getting ready
How to do it...
How it works...
See also
Customizing mouse operations (DeviceReplay)
Getting ready
How to do it...
How it works...
Managing processes (SystemUtil)
Getting ready
How to do it...
Measuring time (MercuryTimers)
Getting ready
How to do it...
How it works...
Resolving file locations (PathFinder)
Getting ready
How to do it...
How it works...
Loading shared object repositories (RepositoriesCollection)
Getting ready
How to do it...
How it works...
Loading and creating XML documents (XMLUtil)
Getting ready
How to do it...
Drawing a rectangle on the screen with Win32 API methods (Extern)
Getting ready
How to do it...
How it works...
Verifying binary file contents (FileCompare)
Getting ready
How to do it...
How it works...
Implementing a custom reserved object
How to do it...
How it works...
Using remote objects
Getting ready
How to do it...
How it works...
Utility statements
Getting ready
How to do it...
9. Windows Script Host
Introduction
Reading a key from the Windows® system registry
Getting ready
How to do it...
How it works...
Writing a key to the Windows® system registry
Getting ready
How to do it...
How it works...
Deleting a key from the Windows® system registry
Getting ready
How to do it...
How it works...
Running a process using the Windows® system shell
Getting ready
How to do it...
How it works...
10. Frameworks
Introduction to test automation frameworks
Definition of a test automation framework
Advantages of using a test automation framework
Types of test automation frameworks
Selecting a framework type
Modular-driven framework
Data-driven frameworks
Keyword-driven frameworks
Hybrid frameworks
Designing a test automation framework
Key design activities for a framework
Components of a framework
Controller
Reusable components (actions)
Event handler
Reporter
Building a test controller
Getting ready
How to do it...
