Who this book is for

This book is designed to be an invaluable source of reference for end users of HP's UFT.

Depending on your exposure level to coding with VBScript, you may require assistance with some of the more advanced design patterns.

Sections

Each chapter contains sections using the following structure:

Getting ready

This section tells us what to expect in the recipe and describes how to set up any software or any preliminary settings needed for the recipe.

How to do it...

This section characterizes the steps to be followed for "cooking" the recipe.

How it works...

This section usually consists of a brief and detailed explanation of what happened in the previous section.

There's more...

It consists of additional information about the recipe in order to make the reader more confident about using the recipe.

See also

This section will, where needed, contain additional references to the recipe.
